

The Manufacturers' Bill of Rights

We the Manufacturers, in order to form a more perfect Union between Man and Machine, establish better productivity, ensure upward OEE standards, provide for the common accessibility of reports, promote general asset welfare, and secure the blessings of digital safety and performance, do ordain and establish this Bill of Rights for the Freedom Smart Manufacturing Platform.

- I. FREEDOM shall not abridge, rather, it shall enhance, the right of the manufacturer to gather, organize, and present information...**

generated from industrial assets, with the aim of providing better data and bigger operational insights, through the use of six Core Applications.

- II. The Liberty to connect to any industrial asset without any special engineering, or set-up delays, shall not be infringed...**

and the PLATFORM shall remain control and process agnostic; even if the aforementioned assets are manually operated.

- III. Reports generated by the PLATFORM are to remain available for access at any time...**

from any connected device—including desktops, laptops, tablets, or smart phones.

- IV. FREEDOM shall be available to everyone, from the shop floor to the top floor...**

with customizable real-time dashboards allowing you to manage utilization, maximize availability, improve performance, and root out inefficiencies.

- V. No person, having implemented the FREEDOM PLATFORM of their own free will, shall be subject to cruel and unusual wait times to see valuable Returns on Investment...**

and payback should be achieved in Days, not Years.

- VI. In all FREEDOM deployments, the customer shall enjoy the right to a speedy and easy installation process...**

and have access to FREEDOM counselors before, during, and after his or her deployment.

- VII. Having been taxed enough already, IT Departments shall incur no hidden costs or unnecessary burdens to implement FREEDOM...**

and the establishment of a light IT footprint and browser based user access shall be preserved.

- VIII. No 3rd party licensing fees are to be established, or managed, or needed, to liberate a Manufacturer's data...**

and the PLATFORM shall be easily integrated with all existing business systems.

- IX. The ability of the PLATFORM to pass vulnerability scans by major customers, shall be passed on to all customers...**

and the PLATFORM shall retain its "Certificate of Networthiness" from the US Government.

- X. In order to ensure greater access for all Manufacturers, FREEDOM shall make available six complementary Smart Modules...**

that enhance PLATFORM functionality and overall value of the Core Applications.
